Factory Reset Lenovo Yoga 260 to Windows 10

Before the recovery process

1. Turn on laptop and press “Enter” then “F1” until the logo screen pops up for the Setup Utility program
2. From the Setup Utility program main menu, find the “Restart” tab and make sure “OS Optimized Defaults” is set to “Enabled”
3. Press F9 to load default settings, select “Yes” when prompted, and press Enter
4. Press F10 to save your changes and exit
5. Continue with Performing The Recovery Process

Performing the Recovery Process

1. Connect the Lenovo USB to the laptop
2. Turn on laptop and press “Enter” then “F12”. The boot menu should be displayed
3. Select the “USB HDD” option by pressing enter. The recovery program should open
4. Select your language and click “Next”
5. Read the license, select “I agree to these terms and conditions” and click “Next”
6. Click “Yes” in the displayed box to continue the recovery process
7. When the recovery process finishes, you are prompted to remove the USB key and restart the computer. Remove the USB key and click “Yes” to restart the computer
8. The rest of the process will continue on its own, the laptop will keep setting up and restart a few times. The process will take about an hour.
9. When the Windows setup screen is displayed, follow the instructions on the screen to complete the Windows Setup
10. When it asks for a name, put in the student’s name but no password
11. Once done setting up, change the time zone
12. Install the Lenovo System update tool from their website or CFS02
13. Update all drivers that are critical/recommended
14. Should be all set
